Advanced calculus 1 problems

Subjects Home This textbook is suitable for a course in advanced calculus that promotes active learning through problem solving. It can be used as a base for a Moore method or inquiry based class, or as a guide in a traditional classroom setting where lectures are organized around the presentation of problems and solutions. This book is appropriate for any student who has taken (or is concurrently taking) an introductory course in calculus. The book includes sixteen appendices that review some indispensable prerequisites on techniques of proof writing with special attention to the notation used the course. A solutions manual is freely available electronically. Undergraduate students interested in introduction to proofs. [This] book is a piece of excellent mathematical writing. The readers—student or teacher— will enjoy precise and clear exposition and careful editing, as well as fine language sparking with a decent dose of humor. -- Piotr Sworowski, Mathematical Reviews Learning from this book might be a challenging and time-consuming task, but the reader will be rewarded by a deep understanding of advanced calculus. -- Antonin Slavik, Zentralblatt MATH Academia.edu uses cookies to personalize content, tailor ads and improve the user experience. Free Preview Presents over 500 intensive exercises on calculusRecalls important definitions, theorems, and concepts in all chaptersDiscusses topics on set theory, numbers, functions, limits and continuity, derivative, integral calculus, Rolle's theorem, mean value theorem, optimization problems, sequences, and series About this Textbook This book includes over 500 most challenging exercises and problems in calculus. Topical problems and exercises are discussed on set theory, numbers, functions, limits and continuity, derivative, integral calculus, Rolle's theorem, mean value theorem, optimization problems, sequences and series. All the seven chapters recall important definitions, theorems and concepts, making this book immensely valuable to undergraduate students of engineering, mathematics, statistics, computer science and basic sciences. About the authors BILAN DAVVAZ is Professor at the Department of Mathematics, Yazd University, Iran. He earned his Ph.D. in Mathematics with a thesis on "Topics in Algebraic Hyperstructures" from Tarbiat Modarres University, Iran, and completed his M.Sc. in Mathematics from the University of Tehran. Apart from his role of a Professor, he also has served as Head of the Department of Mathematics (1998–2002), Chairman of the Faculty of Science (2004–2006) and Vice-President for Research (2006–2008) at Yazd University, Iran. His areas of interest include algebra, algebraic hyperstructures, rough sets and fuzzy logic. A member of editorial boards for 25 mathematical journals, Prof. Davvaz has authored 5 books and over 550 research papers, especially on algebra, fuzzy logic, algebraic hyperstructures and their applications. Table of contents (7 chapters) Sets, Numbers and Functions Pages 1-40 Davvaz, Bijan Limits and Continuity Pages 41-76 Davvaz, Bijan Derivatives Pages 77-143 Davvaz, Bijan Optimization Problems Pages 145-166 Davvaz, Bijan Integrals Pages 167-268 Davvaz, Bijan
